- Sunonwealth established the brand of SUNON in 1980. Our employees devote their time to focusing on the research and development of core motor technology. In the fields of motors, fans, cooling modules, ventilation fans, and air purification solutions, SUNON is always desperate to innovate and has set the latest trend for lots of industrial applications. We developed the first MagLev motor fan in the world, the smallest and thinnest magnetic levitation motor fan product.
- SUNON has become the best thermal solution provider for clients across various industries, such as IT, automobile electronics, optical electronics, and network communication applications.

- CWTC, a subsidiary of CWE, was established on December 24, 2009. Initially focused on LED lead frames and molding compounds, it became publicly listed on September 13, 2016 (Code 6548). In 2017, CWTC expanded into semiconductor metal lead frames, emerging as a global IC substrate leader. With expertise in precision molding and strict process control, CWTC continues to drive innovation in the lead frame industry.
- CWTC prioritizes mutual benefits, sustainability, and a win-win environment for employees and employers. The company and its subsidiaries hold IATF 16949, ISO 9001, and ISO 14001 certifications, ensuring a structured quality and environmental management system. Through continuous improvement via the Plan-Execute-Audit-Improve cycle, CWTC enhances management capabilities to provide a better environment and service for customers.

## Join WECS – Powering the Future of Green Energy!

- Walsin Energy Cable System (WECS), a joint venture between Walsin Lihwa and NKT, combines Taiwan's and Europe's expertise to produce high-voltage submarine cables for the green energy transition. Our Kaohsiung facility will begin supplying reliable HVAC submarine cables for offshore wind projects by 2027.
- Why Join WECS?  
Be part of a pioneering team driving Asia's energy transformation. Located in Kaohsiung, a key APEC hub, WECS is dedicated to sustainable energy solutions.
- A Unique Career Opportunity  
WECS blends startup innovation with the stability of two global leaders. Whether you're an emerging talent or an industry expert, you'll have the chance to make a meaningful impact.
- Life at WECS  
Join a collaborative, purpose-driven culture where you'll advance your career while shaping a greener future.

Step into the future with us at WECS. Explore career opportunities and be part of the energy revolution!

- Yomeen Co. Ltd. is dedicated to AIoT smart system development, focusing on high-performance cloud-based solutions for smart F&B services, e-commerce, loyalty program management, and integrated unmanned vending machine systems. Over the past five years, we have successfully collaborated with more than 400 businesses and received support from over 15 government grant programs, holding one invention patent and two utility patents.
- Yomeen is committed to applying innovative technologies. Our recently launched next-generation smart vending machines integrate interactive large screens and AI voice assistants, developed in partnership with well-known retail brands. We are also making significant strides in smart healthcare platforms, including the development of AI doctor systems and smart wristbands, actively expanding into international markets to promote smart health solutions.

Job

Blockchain Engineer

Job  
Location

Kaohsiung/Vietnam

Job  
Description

1. Develop, integrate, and maintain blockchain applications, with a focus on connecting to cryptocurrency exchange APIs.
2. Design and implement smart contracts to ensure secure and transparent transaction processes.
3. Build and maintain decentralized applications (dApps), ensuring system performance and stability.
4. Develop and optimize digital wallet systems to support the storage, transfer, and management of various cryptocurrencies.
5. Ensure the security of transaction data by implementing encryption technologies and multi-layer security mechanisms.
6. Assist in configuring and monitoring blockchain nodes on both the client-side and server-side.
7. Analyze emerging blockchain technologies, provide technical recommendations, and optimize company products.

Required Skills

1. Proficient in Python, JavaScript, Node.js, or Go programming languages.
2. Familiar with blockchain technologies, including Ethereum, Binance Smart Chain, Solana, and Polygon.
3. Experience in smart contract development using Solidity, Rust, or Vyper.
4. Skilled in integrating cryptocurrency exchange APIs such as Binance API, KuCoin API, and Coinbase API.
5. Understanding of blockchain consensus mechanisms such as PoW, PoS, and DPoS.
6. Knowledge of digital wallet development and encryption technologies (e.g., AES, RSA, ECDSA).
7. Strong awareness of data security and risk management, with an understanding of KYC/AML regulations.
8. Familiarity with DeFi (Decentralized Finance) applications and protocols is a plus.
9. Excellent team collaboration and problem-solving skills, with English communication skills preferred.
